Team ID	*****
Project Name	Smart Lender – AI-Powered Loan Approval Prediction System
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS "I need a quick, reliable way to get loan approvals without lengthy paperwork." "I want to know instantly whether my loan will be approved or not." "I hope the system considers my full financial profile, not just credit history."		THINKS "Will my application be judged fairly based on actual financial data?" "I wonder if the ML model truly understands complex financial situations." "A faster approval process means I can plan my finances better."
	PERSONA NAME <i>Credit Officer / Loan Applicant</i>	
DOES - Submits personal and financial details (income, loan amount, credit history) through the SmartLender web form. - Reviews the instant approval or rejection prediction provided by the XGBoost model. - Consults with a bank credit officer for further guidance in case of a high-risk flag.		FEELS - Anxious about whether their financial profile is strong enough to secure the loan. - Relieved when the system provides a fast, transparent, and data-driven decision. - Confident in the platform's fairness due to ML-backed predictions.
